

Job Title: Integrated Circuit Applications and Test Engineer

Job Description: Senseseeker Engineering is looking for an applications and test engineer to contribute to the operation and verification of infrared image sensor readout integrated circuits. Duties will include developing operational specifications on new IC designs, verifying designs will meet customer goals and requirements, understanding how to operate developmental parts (and providing feedback to the design team for future parts), testing readout integrated circuits for operation and specifications compliance, operating the ICs at customer facilities and training customers how to operate the parts. This position will work closely with IC design engineers as well as infrared camera manufacturers and requires excellent communications skills. The candidate should also be comfortable working on a broad range of topics in a relaxed small business environment.

Work Experience: 2 - 20 years

Required Education: Bachelor's degree in electrical engineering or physics.

Preferred Education: Master's degree in electrical engineering with research experience in image sensors or advanced mixed-signal circuits.

Required Attributes:

- US person status **required** for this position, pursuant to the terms of government contracts with Senseseeker*
- Excellent teamwork and communications skills with very good written and verbal communication
- Organized and methodical documentation
- Experience testing and developing newly designed CMOS integrated circuits
- Strong laboratory and electronics skill set
- Patience with customers and the ability to explain detailed concepts in a simple fashion

Desired Attributes:

- Practical test experience with analog-to-digital converters, image sensors and infrared DROICs
- Experience with test electronics development and interfacing with electronics subcontractors
- Experience with Automated Test Equipment test plan development, preferably with image sensors
- Working knowledge of data analysis through scripting and Matlab

Job Type and Location: Full-time in Goleta, CA, USA

Benefits: Competitive compensation, growth opportunity, flexible schedule, relaxed working environment, located in a great beachside community

* This position requires work on projects which are protected under US ITAR laws, consequently, *only US Persons will be considered for this position by law*. For this purpose, the term "US person" means an individual who is a citizen of the United States, a lawful permanent resident alien of the US (e.g., a "Green Card" holder), a refugee, or someone in the US as a protected political asylee, or under amnesty.

Senseseeker Engineering Inc. provides silicon IP, IC and image sensor design and systems engineering all targeted at the unique needs of the scientific and infrared image sensor community. We specialize in the design of digital imaging sensors and readout integrated circuits for hybrid image sensing arrays. We are located in the beautiful Santa Barbara, CA, area amid the west coast's hub of infrared and scientific image sensor companies. For more information see www.senseseeker.com.

Senseseeker Engineering Inc. is an equal opportunity employer and considers qualified applications for employment without regard to sexual orientation, gender identity, gender expression, race, color, sex, creed, religion, national origin, age, disability, veteran status, or any other protected class.
