

Facility General Technician

Job Description: Senseker is looking for a Facility General Technician with a good background in general handyperson skills, a strong sense of organization and a desire to learn new skills. You will be working on a wide variety of activities and taking ownership over periodic activities necessary to keep laboratory and factory facilities in good working order and in compliance with our quality system. You will be assisting with mechanical and electrical research and manufacturing operations and learning about Senseker product flow. You will also be building, maintaining and modifying various facility equipment. Your purview at Senseker will expand according to your interest and drive to succeed as we grow together.

Work Experience: 3+ years of maintenance experience on mechanical or electrical equipment

Required Education: High school diploma or GED

Job Responsibilities:

- Support manufacturing, engineering and technicians as needed (we will provide training)
- Own all handyperson tasks at Senseker, including working with outside facilities vendors to accomplish repairs and maintenance
- Perform daily and weekly logging of equipment and environmental conditions through routine rounds/log taking (temperatures, voltages, currents, humidity, etc.)
- Perform periodic cleanroom maintenance and monitoring
- Follow all safety procedures while performing work and provide advice to continuously improve facility safety, organization and cleanliness
- Fully comply with all physical security procedures and policies

Required Attributes:

- US person status **required** for this position, pursuant to the terms of government contracts with Senseker*
- Neat and organized, with a desire to help others be neat and organized as well
- Background in building, machining or trades (mechanic, electrical, plumbing or technician)
- Strong mechanical aptitude and general shop experience

Desired Attributes:

- Good verbal and written communication skills
- Working knowledge of high vacuum and cryogenic systems
- Experience operating and maintaining FDM 3D Printers
- Machine shop experience, including good fabrications skills
- Experience operating electrical and nonelectrical manufacturing equipment
- Experience with cleanroom facilities
- Proficiency with Microsoft Office products (excel, word) and web-based operational tools
- Ability to complete tasks with little direction (you will own your tasks)

Job Type and Location: Santa Barbara, CA

Benefits: Competitive compensation, health and retirement benefits, flexible schedule, relaxed working environment, located in a great beachside community.
